

Creating Pathways for Correctional Health Research Translation Symposium

Priority research topics identified by the audience.

Research questions

- Integrative Review- what does the evidence say?
- Interventions / HIPPA Issue
 - Re-Incarcerated- What happens?
 - Peer-led
- Using Risk Reduction Model for use/access to glucometers
- Training/ roles of C.O.'s- is there a reduction in ER use, costs of care?
- Incentives are challenging, what is the best strategy
- How do incentives and self-report data impact accuracy of data?
- Sub-populations- receptive- “the sweet spot” as Donna says. Organizational Factors.
- Diabetes: Prevention, Self- care / Maintenance
- Ethnographic Study of Glucose control- observational
- CBPR/ Peer led methodologies
- Use of federal guidelines → Cost issues?
- Co-Morbidities as a way of engaging DOC unpacking variables

Funding Issues- what is important to funders and clinical partners?

- Evidence- based research
- Research that saves \$
- Identify priorities-
 - “Being in the right place at the right time”
- Tap into Foundations/ faith community
- Use models that work – Transplant, or adapt
- HUD
- Use AA model- Faith based peer led training
